4.2 Quality and importance

ARTICLE 4.1 QUALIFICATION (79/409/EEC)

During the breeding season the area regularly supports:

Charadrius morinellus
(Europe - breeding)

2.4% of the GB breeding population
7 year mean, 1987-1993

ARTICLE 4.2 QUALIFICATION (79/409/EEC)

4.3 Vulnerability

There are few threats to the interest of the site. Most of the site is a National Nature Reserve managed for its nature conservation interest by SNH. Ben Wyvis is popular with hill walkers and their impact upon the fragile montane vegetation is being monitored. There have been proposals in the past for recreational development on the plateau, including skiing. Any such proposed development would be dealt with through the planning system.
