4.1 Other site characteristics

Soil & geology:

Acidic, Basic, Boulder, Limestone, Metamorphic, Peat, Sedimentary

Geomorphology & landscape:

Crags/ledges, Montane, Slope, Upland

4.2 Quality and importance

ARTICLE 4.1 QUALIFICATION (79/409/EEC)

During the breeding season the area regularly supports:

Charadrius morinellus
(Europe - breeding)

3% of the population in Great Britain
Count for 1993

ARTICLE 4.2 QUALIFICATION (79/409/EEC)

4.3 Vulnerability

There are no current threats to the site. The whole upland area is managed for sport shooting of red deer which has reduced their overall numbers. Although remote, Ben Alder is used by hill walkers who are welcomed to use the Estate's well-maintained and established footpaths. The minimal pressure from this activity upon the breeding dotterel population is not thought to be damaging.
